To: Pet Food Customers
Date: October 3, 2019
Subject: AAFCO Defined Natural Status of Certeza 755

To Whom it May Concern,

Corbion wishes to advise its valued customers with respect to its products used in the manufacture of pet foods.

According to the 2017 Association of American Feed Control Officials (AAFCO) Official Publication, the term "natural" is defined as "a feed or ingredient derived solely from plant, animal or mined sources, either in its unprocessed state or having been subject to physical processing, heat processing, rendering, purification, extraction, hydrolysis, enzymolysis or fermentation, but not having been produced by or subject to a chemically synthetic process and not containing any additives or processing aids that are chemical synthetic except in amounts as might occur unavoidably in good manufacturing practices".

Corbion's Certeza 755 is produced by fermentation using specifically selected food cultures. Thus, this product would meet the definition of "natural" provided by the 2017 AAFCO Official Publication.

Sincerely,

A handwritten signature in black ink, appearing to read "Rob Ames", with a long horizontal flourish extending to the right.

Rob Ames
Business Development Director
